

VanEck Morningstar Wide Moat ETF

MOAT gives investors exposure to a diversified portfolio of attractively priced US companies with sustainable competitive advantages according to Morningstar's equity research team. Our wide moat ETF aims to provide investment returns, before fees and other costs, that track the performance of the Index.

MOAT

Benefits

High conviction Wide Moat US equity strategy

A focus on quality US companies Morningstar believes possess sustainable competitive advantages, or "wide economic moats™".

Attractive valuations

Targets companies trading at attractive prices relative to Morningstar's estimate of fair value.

Morningstar's Core Equity Research

Fuelled by Morningstar's rigorous equity research process.

Performance

	1 Month (%)	3 Months (%)	6 Months (%)	1 Year (%)	3 Year (% p.a.)	5 Year (% p.a.)	Since Inception (% p.a.)
Price return	4.95	7.47	6.64	16.94	8.39	10.38	13.27
Income return	0.00	0.00	9.15	10.04	5.99	4.16	2.99
Total return	4.95	7.47	15.79	26.98	14.38	14.54	16.26
MOAT index	4.97	7.53	15.93	27.26	14.67	14.73	16.65
S&P 500 Index	6.40	11.49	17.24	35.71	14.10	16.09	15.19

The table above shows past performance of the ETF from 26 June 2015. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Effective 20 June 2016, Morningstar implemented several changes to the Morningstar Wide Moat Focus Index construction rules. Among other changes, the index increased its constituent count from 20 stocks to at least 40 stocks and modified its rebalance and reconstitution methodology. These changes may result in more diversified exposure, lower turnover, and longer holding periods for index constituents than under the rules in effect prior to 20 June 2016. Performance may be lower or higher than performance data quoted. Fund returns reflect dividends and capital gains distributions. Performance current to the most recent month end is available at vaneck.com.au.

The S&P 500 is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of the broad US equities market. It includes the 500 largest US listed companies, weighted by market capitalisation. MOAT's index measures the performance of 40 to 80 US companies with a Morningstar Economic Moat Rating™ of "Wide". MOAT's index has fewer securities and different industry allocations than the S&P 500. MOAT invests directly in the underlying securities that comprise the index. MOAT acted as a 'feeder fund' from 9th October 2019 – 6 July 2022 giving investors access to a fund domiciled in the United States. From 26 June 2015 – 8th October 2019, the fund operated as a CDI.

Key risks

An investment in our wide moat ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations and tracking an index. See the VanEck Morningstar Wide Moat ETF PDS and TMD for more details.
