

MVA

VanEck Australian Property ETF

Fund Description

The VanEck Australian Property ETF invests in a diversified portfolio of ASX-listed securities with the aim of providing investment returns (before Management fees) that closely track the returns of the MVIS Australia A-REITs Index.

The MVIS Australia A-REITs Index is a pure-play Australian sector index, designed to capture the performance of the property sector of the Australian economy.

The Index includes the largest and most liquid ASX-listed Real Estate Investment Trusts (A-REITs).

Individual Index components are determined using a stringent rulesbased methodology focusing on liquidity, with a minimum of 10 holdings, each with a maximum weighting of 10%.

An investment in the ETF carries risks associated with: financial markets generally, individual company management, industry sectors, stock and sector concentration, fund operations and tracking an index. See the PDS for details.

Fund Details

Inception date	14/10/2013
Shares outstanding	27,105,413
NAV	\$23.54
Net assets	\$638.1M

The tables above show past performance of the ETF from 14 October 2013. Index performance shown prior to 21 December 2012 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

The S&P/ASX 200 A-REIT Index is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of the largest A-REITs in Australia, from the S&P/ASX 200, weighted by market capitalisation. MVA's index measures the performance of the largest and most liquid ASX-listed A-REITs, with a maximum weight of 10% in each security at rebalance. MVA's index has fewer A-REITs and different property sector allocations than the S&P/ASX 200 A-REIT Index.

Mid (\$1.0 - \$5.0B)	31.77%
Small (<\$1.0B)	0.00%

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted average of each portfolio security's distributed income during the prior twelve months before Management fees.
