VanEck Vectors Australian Equal Weight ETF

Fund Description

The VanEck Vectors Australian Equal Weight ETF invests in a diversified portfolio of ASX-listed securities with the aim of providing investment returns (before management costs) that closely track the returns of the MVIS Australia Equal Weight Index.

The MVIS Australia Equal Weight Index is a pure-play index that includes the largest and most liquid ASX-listed companies, combining benchmark with blue-chip characteristics, purpose-built to capture the true performance of the Australian equities market, with real diversification across both securities and sectors.

Individual Index components are determined using a stringent rules-based methodology focusing on liquidity, with a minimum of 25 holdings, weighted equally.

The unique pure-play approach expands local exposure to include offshore companies with a listing in Australia which generate at least 50% of their revenues (or - where applicable - have at least 50% of their assets) in this market.

Fund Details

Inception date	04/03/2014
Shares outstanding	23,178,863
NAV	\$26.35

The tables above show past performance of the ETF from its Inception Date and of the Index from its Base Date. Index performance shown prior to its Launch Date is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted average of each portfolio security's distributed income during the prior twelve months before management costs.

The Lonsec Rating (assigned September 2017) presented in this document is published by Lonsec Research Pty Ltd ABN 11 151 658 561 AFSL 421 445. The Rating is limited to "General Advice" (as defined in the Corporations Act 2001 (Cth)) and based solely on consideration of the investment merits of the financial product(s). Past performance information is for illustrative purposes only and is not indicative of future performance. It is not a recommendation to purchase, sell or hold VanEck product(s), and you should seek independent financial advice before investing in this product(s). The Rating is subject to change without notice and Lonsec assumes no obligation to update the relevant document(s) following publication. Lonsec receives a fee from the Fund Manager for researching the product(s) using comprehensive and objective criteria.
