

FLOT

VanEck Vectors Australian Floating Rate ETF

Fund Description

The VanEck Vectors Australian Floating Rate ETF (FLOT) invests in a diversified portfolio of Australian dollar denominated floating rate bonds with the aim of providing investment returns (before management costs) that closely track the returns of the Bloomberg AusBond Credit FRN 0+ Yr Index (BAFRNO).

BAFRNO is a market value weighted index comprising floating rate bonds that are of investment grade quality. The index typically includes bonds issued by corporate entities such as the four largest banks in Australia, foreign banks, other lending institutions and Australian listed property trusts.

To be included in the index a floating rate bond issue must have a published investment grade credit rating from at least one of S&P, Moody's or Fitch, a minimum outstanding face value of \$100 million and a minimum of one month to maturity. The bonds must also be issued in the Australian debt market under Australian law.

The tables above show past performance of the ETF from its Inception Date and of the Index from its Base Date. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.
