VanEck Vectors MSCI World ex Australia Quality ETF

Fund Description

The VanEck Vectors MSCI World ex Australia Quality ETF seeks to track the performance of the MSCI World ex Australia Quality Index (with net dividends reinvested) in Australian dollars, before taking into account fees, expenses and tax.

The MSCI World ex Australia Quality Index (\$A) (Quality Index) is based on a traditional market capitalisation-weighted index, the MSCI World ex Australia Index (Parent Index), which includes large- and mid-capitalisation stocks.

The Quality Index aims to capture the performance of the highest quality growth stocks from the Parent Index, on the basis of a quality score determined by three key factors:

1. high return on equity;
2. stable year-on-year earnings growth; and
3. low financial leverage.

The Quality Index reweights the selected quality growth stocks from the Parent Index to emphasise stocks with the highest quality scores according to MSCI.

The tables above show past performance of the ETF from its Inception Date and of the Index from its Base Date. Index performance shown prior to its Launch Date is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

These are not recommendations to buy or sell any security.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted harmonic average of each portfolio security's distributed income during the prior twelve months before management costs.
